NOTICE.

A sitting of the

NEW RIVER DISTRICT COURT.

Division No. 2, will be held

AT CALGARY,

ON

Thursday, the 25th Day of

October, A.D., 1883.

Court will open at 11 o'clock in the fore-

noon.

T. DOWLING,

CLERK OF THE COURT.

-Calgary, August 30, 1883.

LOCAL NEWS.

NEW BROOK.—J. G. Baker & Co.

have just received 180 wood and coal

stoves, which will be sold cheap.

POLICE HOSPITAL.—The hospital

contains at present four patients,

three civilians and one policeman.

C. P. CONSTRUCTION.—Tracklaying

work is vigorously proceeded with

by the C. P. R., north to south of

Calgary.

FIRST ARRIVAL.—The first train

of freight for Calgary, carried the

plant of the CALGARY HERALD, and

some goods for Winder & Co.

IS LOST.—The guard-room has

but one occupant, an Indian named

Uzi Lip, who is serving his time for

stealing a white man last winter.

TROOP PHOTOGRAPHED.—Immediately

after full dress parade, on

Tuesday morning, the troop station-

ed here was photographed by Mr.

Bligham.

ATTRACTIONS CALG.—We have been

shown some fine specimens of what

has been pronounced "saturnic

coal," lately brought from the

mountains.

BIG DRIVES OF LOGS.—The Bow

River Mills are now receiving a drive

of about 8000 logs, and are saving

night and day to supply the wants

of their customers.

PROFESSORS.—Some of the profes-

sors have returned from the

mountains, bringing fine specimens

with them, and glowing accounts of

what they have seen.

TREATY MONEY.—The treaty

money is to be paid to the Story In-

dians, at Marley, to-morrow. The

Indians receive theirs on the 10th

and the Blackfoot on the 15th prox.

PENITENTIARY MESSON.—A meeting

was recently held in the Hudson

Bay Store, for the appointment of

Managers in connection with the

above Mission, when the following

gentlemen were appointed: Major

Walker, Dr. Henderson, and Mr.

Joseph McPherson. The manage-

ment have adopted the envelope

system for their weekly offering.

REPUTABLE DISTRICTS.—We under-

stand that Alberta has been divided

into two registration districts.

One office will be established at Cal-

gary, the other at Edmonton.

TRAIN SERVICE.—A passenger train

now leaves Calgary, daily for the

east, at 10:30 a.m., and one leaves

Medicine Hat for Calgary, every

morning at 8 a.m., arriving here

about 5 p.m.

EXCURSION.—The Brandon Town

Office proposes visiting Calgary, in

a few days. Mr. Egan has placed a

sleeping at their disposal. Could not

something be done towards giving

them a public reception?

FIRST ENGINE.—On the arrival of

the first engine into Calgary, the

hill side was crowded with staring

spectators, many of whom had

never seen one before, and others

who had not been near a railway for

eight or ten years.

ROYAL HOTEL.—Mr. Moulton has

just closed his popular hotel for the

season, owing to the fact that he

could obtain no suitable building site,

at present. We believe it is his in-

tention to return to Calgary and

erect a large hotel, when the town is

surveyed. The outfit was sold by

auction on Tuesday last, and owing

to the successful manner in which

Mr. T. S. Burns wielded the ham-

mer, fancy goods were obtained.

PULSON, geologist of the Manitoba

Historical and Scientific Society,

spent a day in and about Calgary,

and reports a very interesting field

of study for men of his profession. He

has promised to prepare a paper on

his researches in this locality for THE

HERALD, which we have no doubt

will be hailed with interest by

our readers. We hope also to be

favoured with a paper by the Botanist

of the Society.

CALGARY HOUSE.—We have had

the pleasure of inspecting the new

hotel just completed by Dunne &

Wright, and find it a perfect model

of taste and interior. It contains a

large comfortable parlour, and a

number of bed-rooms, all handsomely

appointed and furnished in the best

of style. The dining-room has ac-

commodation for about 40 guests,

and the reading room is well sup-

plied with the latest papers. Messrs.

Dunne & Wright are well known to

every one in the public, and we

have no doubt they will receive the

large share of public patronage,

which they so justly merit.

THE NATIVE.—We have to con-

gratulate Mr. C. W. Peterson, of the

Firm of Peterson & Peterson, Bar-

isters of this place, on his success in

securing passes over the C. P. R. for

several hundred of the Longfellow, Sher-

brock & Co's men. It seems that

when engaging the men were prom-

ised passes back on the completion of

the contract, but when the work was

completed, and pay day came, they

were refused and the men were lying

here idle, without any dollar day or

night for some time, and but for the

clever management of the case by the

above named gentleman, might have

caused serious embarrassment.

Met the last pleasing feature of the

affair, was the handsome fee awarded

to Mr. Peterson.

SANITARY SERVICE.—Divine ser-

vice is held at the Catholic Chapel

every Sunday at 10:30 a.m. and 4:30

p.m.

PENITENTIARY SERVICE.—The ser-

vice in connection with the Peni-

tentiary Mission will be held in a tent

near the Calgary House on Sunday

next at 7 p.m.

CATHOLIC INDUSTRIAL SCHOOL.—

Mr. Mathew Combe is waiting for

tenders from the Industrial School at

High River, his room as they arrive

parties with the tender will be sup-

plied with light fuel.

Hudson Bay Port.—The H. B.

Port, at Calgary, has lately been

## CALGARY.

The above named town which, at the present time is creating so much interest throughout the whole North West, Ontario and England is situated upon a beautiful stretch of bottom land about six miles in length and from one to three miles wide, enclosed on the north side by the Bow River in a semi-circular form, and on the south by a range of hills from 100 to 150 feet in height.

It is divided into two parts by the Bow River, which at its confluence with the Bow forms a number of beautiful islands well wooded, and admirably suitable for a park.

Both rivers are pure, clear, and cold with pebbly beds and beaches, dotted with innumerable trees, and capable of supplying a water power for an unlimited number of mills and factories, while on the north side of the Bow another range of hills rises to about 300 feet from the bed of the river; and away to the west and southwest rise the Rockies in majestic grandeur, covered with everlasting snow, plainly visible to the naked eye, as though they were only a few miles distant.

The future of Calgary seems very bright indeed, viewed from several standpoints, any one of which is sufficient to confer on the happy possessor a position unsurpassed in the North-West Territory.

### THE COMMERCIAL OUTLOOK.

Calgary has long been acknowledged as the great central point of the extensive fertile strip along the Rockies, extending from the Blackfoot reserve on the east, to the Mountains on the west, a distance of 300 miles in extent, and containing potatoes, cabbage, cauliflower, turnips, carrots, beets, parsnips, and corn, all in the highest state of cultivation. On asking him, if the summer frosts affected anything in his garden, the reply was "look and see if you can find any trace of it," we looked but could find none, and, although this was the second week of August, Mr. Glen had been using the soil for nearly a month. We brought home some samples, and after trying them can testify as to their excellent qualities.

Mr. Glen has also about 22 acres of Oats, 8 acres of Wheat and 5 acres of Barley, all of which notwithstanding the dry season, will compare favorably with the average crop of the best parts of Ontario.

W. next visited the farm of Mr. James Vortier also on Fish Creek, and found about 40 acres under cultivation, consisting of Oats 27 acres, Barley 10 acres, and wheat 34 acres.

On inquiring why coarse grains were raised instead of wheat, we were informed that heretofore they had no market for wheat nor could they get it ground as there was no grist mill in the vicinity, therefore they raised coarse grains and potatoes, which sold readily at from 4 to 10 cents per lb., and bought their flour at from \$15 to \$25 per sack, of 90 lb. We also inquired the yield per acre, of the different grains, and found that it was no uncommon thing to get 70 to 75 bushels per acre, on land that had been broken the preceding year, while on spring breaking 40 to 50 was the usual yield. As to potatoes, Mr. Vortier informed us that last year he had one under crop, that he used from it for his own table from the time the new potatoes came in till the fall, and after keeping enough for his winter supply he sold 11,000 lbs at 4 cts. per lb., thus realizing \$440 from his last year's crop, which he used for his winter supply. This is a record we think hard to beat, in as much as if any one can beat it we would certainly like to hear from him. The wheat we saw on the other farms was decidedly fine, yielding from 34 to 36 bushels per acre. Messrs. Glen and Vortier, informed us that other settlers on Fish Creek and its vicinity viz: Messrs. Reboli, Campbell, Robb, Ross, Jacques Bros. and others, had crops equal, if not superior to their own and wished us very much to visit them; but our time

being limited we were obliged to the pleasure till a future occasion.

### THE FARMER'S INTERESTS.

There has been a good deal of speculation indulged in of late as to whether this country produces all the necessary elements for a successful farming country. Tourists have been continually inquiring from us "what will the country produce?" and "can summer frosts kill everything?" and all such questions, remarking at the same time that if it can be fully demonstrated that the surrounding country is fit for agricultural purposes the success of Calgary is beyond doubt only a question of a few short years; therefore in order that we might give our readers a true and reliable account of the farming prospects we determined to go for ourselves, and accordingly in company with some other gentlemen procured a rig and proceeded to visit some of the farms in the vicinity.

The first place we drew up at was Mr. Glen's on Fish Creek about eight miles south, on the Fort McLeod trail, and found a fine, well cultivated farm with a comfortable 14 story house, out-buildings, and farm-yard which would compete favorably with many of the oldest settlements of Ontario. After inspecting the buildings, we repaired to the garden and was surprised and delighted with a view of the best vegetable garden it has ever been our privilege to inspect, of about 14 acres in extent, and containing potatoes, cabbage, cauliflower, turnips, carrots, beets, parsnips, and corn, all in the highest state of cultivation. On asking him, if the summer frosts affected anything in his garden, the reply was "look and see if you can find any trace of it," we looked but could find none, and, although this was the second week of August, Mr. Glen had been using the soil for nearly a month. We brought home some samples, and after trying them can testify as to their excellent qualities.

Mr. Glen has also about 22 acres of Oats, 8 acres of Wheat and 5 acres of Barley, all of which notwithstanding the dry season, will compare favorably with the average crop of the best parts of Ontario.

W. next visited the farm of Mr. James Vortier also on Fish Creek, and found about 40 acres under cultivation, consisting of Oats 27 acres, Barley 10 acres, and wheat 34 acres.

On inquiring why coarse grains were raised instead of wheat, we were informed that heretofore they had no market for wheat nor could they get it ground as there was no grist mill in the vicinity, therefore they raised coarse grains and potatoes, which sold readily at from 4 to 10 cents per lb., and bought their flour at from \$15 to \$25 per sack, of 90 lb. We also inquired the yield per acre, of the different grains, and found that it was no uncommon thing to get 70 to 75 bushels per acre, on land that had been broken the preceding year, while on spring breaking 40 to 50 was the usual yield. As to potatoes, Mr. Vortier informed us that last year he had one under crop, that he used from it for his own table from the time the new potatoes came in till the fall, and after keeping enough for his winter supply he sold 11,000 lbs at 4 cts. per lb., thus realizing \$440 from his last year's crop, which he used for his winter supply. This is a record we think hard to beat, in as much as if any one can beat it we would certainly like to hear from him. The wheat we saw on the other farms was decidedly fine, yielding from 34 to 36 bushels per acre. Messrs. Glen and Vortier, informed us that other settlers on Fish Creek and its vicinity viz: Messrs. Reboli, Campbell, Robb, Ross, Jacques Bros. and others, had crops equal, if not superior to their own and wished us very much to visit them; but our time

being limited we were obliged to the pleasure till a future occasion.

On our return we left the trail to see the surrounding country, and truly we find it impossible to give even an adequate description of the lovely rolling country over which we passed, thousands of acres just awaiting the hand of the settler to become the garden of the North-West. Before reaching Calgary we came upon the farm of Mr. J. Livingston, who has been 18 years in this country and is now devoting his energies to farming. We found a large farm of 640 acres, situated on the Elbow River about 3 miles from Calgary, enclosed by a wire fence, 5 feet high, well built, and capped with poles; with about 80 acres under cultivation, the crop consisting principally of Oats and Barley in equal quantities, averaging about 4 ft in height; and although Mr. Livingston assured us it had been but poorly put in, from the want of proper implements, still in our judgment an average yield of 50 bushels per acre will be realized, while his root crops, of which he has about 25 acres look equally well. Mr. L. has procured a self binder and is now busy engaged in harvesting. Samples of his grain will be on exhibition at our office.

On enquiring his previous success in farming he assured us that from 11 acres of oats, he had sold 900 bushels, an average of 80 bushels per acre, weighing 45 lbs to the bushel. With these facts before us we do not hesitate to assert that this vicinity with its unlimited supply of pure water in the world, its abundance of wood and coal, the gentleness and salubrity of the climate render it one of the most desirable localities in the whole North-West Territory.

Space forbids us entering on the ranching interests this issue, but we purpose visiting the principal ranches in a short time, when we will be able to give you a full and complete account of that industry.

### MANITOBA HISTORICAL SOCIETY.

The Manitoba Historical Society of Winnipeg, sent a delegation to visit the Rocky Mountains, and report on the various items of interest seen on the route. The party consisted of the Rev. D. M. Gordon, the Rev. Prof. Bryce, Messrs T. C. L. Armstrong, R. E. W. Goodridge, W. H. Hugen, T. F. Stewart, and J. H. Pantou, arrived here the other evening and started on their way to Palmerton. The party succeeded in scaling one of the largest peaks of the Gap, and visited the beautiful falls of the Bow near Palmerton. They attended Divine service with the Indians at Morleyville Mission, and were highly pleased with the comparative progress made by the Indians in civilization.

Quite a quantity of mineral geological and botanical specimens were collected including specimens of coal from the mines on the Bow. The party returned to Calgary, some of the members going south to Fort McLeod, while the remainder proceeded to Winnipeg.
